## Product Image

## Description

### High Quality Chute Slide!

The Starglide Slide – 8 Foot Deck Height – Open Entrance Veer Right is a high-quality, sectional chute slide designed for flexible configuration and long-term durability. Engineered for commercial playgrounds, this slide features an open entrance that easily connects to 8-foot deck platforms, making installation fast and efficient.

Built with a smooth right-veer curve, this Starglide model delivers an exciting ride while maintaining safe, stable movement through the chute. Because this design is fully sectional, you can mix and match parts to create a slide path that works perfectly with your layout—whether you're constructing a new system or replacing an outdated chute.

The entry hood and exit/runout together equal a 36? (.9 m) deck height, ensuring proper alignment and compliance with standard playground deck configurations. Its rotationally molded construction provides excellent UV stability, outdoor durability, and impact

resistance—ideal for schools, parks, HOAs, and commercial play environments.

This model is also a direct replacement for the CSS-8RV chute slide, making it a reliable solution for playground repairs or upgrades.
