Description

Smooth, Dynamic Ride

The Starglide Slide – 8 Foot Deck Height – Veer Right Wave is built for playgrounds that want more excitement and versatility in their design. This sectional chute slide features a right veer curve paired with a wave-shaped dip, creating a more dynamic ride while maintaining safety and smooth performance.

Designed for 8-foot deck height platforms, this Starglide model seamlessly attaches to existing structures, using an adaptable sectional system that allows you to mix and match parts to achieve the ideal layout for your playground. Whether you're replacing an older slide or constructing a new system, the modularity ensures a perfect fit.

With the entry hood and exit/runout equaling 36? (.9 m) deck height, installation is straightforward and compliant with standard playground dimensions. Constructed with commercial-grade rotationally molded plastic, this wave slide is built to withstand heavy use,

harsh weather, and UV exposure—perfect for schools, parks, community playgrounds, and recreation facilities.

The wave + veer combination offers both a mild thrill and safe, controlled movement, making it a rider-favorite in sectional slide assemblies.
