Description

Fun & Dynamic Motion

The Starglide Slide – 8 Foot Deck Height – Left Turn offers a smooth, controlled curved path that adds excitement and visual flow to any playground structure. Built within the highly adaptable Starglide sectional slide system, this model allows you to mix and match slide pieces to build the perfect configuration for your design.

Featuring a left-turn directional curve, this chute slide is ideal for playgrounds that require a compact footprint while still delivering a fun, dynamic motion. Perfect for commercial play environments such as schools, parks, churches, HOAs, and recreation centers, this slide integrates easily into both new builds and replacement projects.

Constructed from commercial-grade rotationally molded plastic, the Starglide left turn slide is engineered for long-term durability, resisting UV fading, weather exposure, and heavy daily use. The entry hood and exit/runout equal a 36? (.9 m) deck height, allowing fast, seamless

mounting onto 8-foot decks.

This model is a direct replacement for several Star Gate and Adventure Playground components, making it an excellent choice for restoring or upgrading aging playground structures.

- Replacement for SGS-8LT, Star Gate Sectional Slide for 8 Foot Deck Left Turn
- Replacement for ASM1173XX, Left Turn Chute Slide for 8 Foot Deck Height – Adventure Playground SM
