Description

Modular & Unique Design!

Bring maximum fun and design flexibility to your playground structure with the Starglide Sectional Slide – Snake Left for 8-Foot Deck Height. Engineered around the Star Gate modular system, this sectional slide delivers a unique “snake” path that adds thrilling movement while fitting into tighter or more creative playground layouts.

Perfect for both new builds and replacements, this Snake-Left configuration gives you the freedom to mix, match, and customize slide segments to suit your exact design. The standardized Entry Section + Exit/Runout equals 36? (0.9m) deck height, ensuring compatibility with any 8-foot platform using the Star Gate system.

With its smooth, curved snake design and durable commercial-grade construction, this slide is the ideal replacement for the SGS-8SNL Snake Left Starglide or any similar 8' sectional chute slide requiring a left-turning snake layout.
