Description

Thrilling & Safe Ride!

The Starglide Slide – Snake Right (8' Deck Height) brings a thrilling, right-curving snake path that kids love while maintaining safe, controlled motion. Designed using a modular sectional system, this slide allows you to mix and match slide components to fit your exact playground layout and design vision.

Built as the direct replacement for the SGS-8SNR Star Gate Sectional Right Snake Slide, this part maintains full compatibility with existing Starglide slide systems. Its entry hood and exit/runout match the standardized 36? (.9 m) deck height transition, ensuring effortless integration with commercial playground structures.

Whether you're refreshing an aging system or building a new slide path configuration, this Right Snake option adds excitement, flexibility, and long-lasting durability to any playground.
