Description

Fun & Twisted Experience

The Starglide Slide – Open Entrance Snake Right (8' Deck Height) combines a fun, twist-filled snake curve with an open-style entry hood for safe, easy rider access. Designed as part of the Starglide modular system, this slide allows you to mix and match sectional components to create the exact configuration your playground needs.

This model is the direct replacement for the discontinued CSS-8SNR Chute Slide, ensuring full compatibility with commercial playground structures that originally used this right-snake open-entrance configuration. Like all Starglide components, the slide is engineered to align perfectly with the 36? (.9 m) entry/exit deck height standards, creating a smooth transition between play components.

Durable, versatile, and exciting for kids, this open-entrance right snake slide is perfect for upgrading older systems or designing brand-new configurations with modern safety and

performance.
