Description

Dynamic Experience!

The Starglide™ 7 Foot Deck Height Triple Bed Split Slide is a high-capacity commercial playground slide engineered for 7-foot (84") deck heights. Featuring a split tri-chute configuration with veer left, straight, and veer right lanes, this slide delivers dynamic sliding experiences while accommodating multiple riders at once.

As part of the Starglide™ sectional slide system, this triple bed slide gives playground designers the freedom to mix and match modular components to create layouts that fit their structure and traffic needs. The entry hood and exit/runout are designed for a 36" (.9 m) deck height, ensuring smooth transitions, safety consistency, and compatibility across supported playground systems.

Perfect for schools, parks, and public play environments, this 7 foot deck split tri-chute slide combines visual excitement with durable, commercial-grade performance.

This Starglide™ slide replaces the following part numbers:
- TAD04914XX – 7 Foot Deck Height Split Tri Chute Slide for 3.5" x 48" System
- TEX04927XX – Split 84" Deck Tri Chute Slide for Expedition Series
