Description

Great Option for Your Playground

>BR> Bring enclosed, high-impact fun to taller playground structures with the 30 Inch Full Tube Slide Assembly, designed for 84-inch (7 ft) deck height playground systems. Tube slides are a favorite for commercial playgrounds thanks to their enclosed design, smooth ride, and efficient use of vertical space.

This slide is intended for a 7-foot deck height, not a 7-foot-long slide. Understanding the difference between deck height and slide length helps ensure proper fit, safety, and compatibility with existing playground structures.

Constructed using 30-inch diameter tube sections with molded bell joints, this assembly allows for secure connections and future expansion using additional straight sections or elbows. The spiral-style configuration keeps the footprint compact while delivering an engaging sliding experience.

This 30 Inch Full Tube Slide Assembly (84? Deck Height) replaces the following models:
- 40008107XX and 50008107XX – Straight Tube Slide, 30? Diameter for 84? Deck Height
- 50608107CX – 30? Diameter × 84? Deck Height Straight Tube Slide

Key Features

- Designed for 84? (7 ft) deck height playground systems
- 30-inch diameter tube slide for enclosed play
- Available in 24? and 30? diameter systems (this model is 30?)
- Molded bell joints for smooth, secure connections
- Allows additional length or elbow integration
- Includes panel, straight tube, 90° elbows, and hardware
- Ideal for commercial playground installations
