## Product Image

## Description

### Popular Choice for Playgrounds

Bring enclosed excitement to taller playground structures with the 30 Inch Full Tube Slide Assembly, designed specifically for 96-inch (8 ft) deck height playground systems. Tube slides are a popular choice for commercial playgrounds thanks to their enclosed design, smooth ride, and ability to maximize play value in vertical layouts.

This slide is designed for an 8-foot deck height, not an 8-foot-long slide. Buyers often search for an 8 ft tube slide, which can refer either to slide length or deck height. This product is intended for an 8-foot-high deck, typically resulting in a longer overall slide length to ensure a safe, controlled descent.

Constructed using 30-inch diameter tube sections with molded bell joints, this assembly allows for secure connections and future expansion using additional straight sections or elbow components.
