Description

Extend Your Tube Slide by 90 Degrees!

Create smooth, compact turns in your playground tube slide system with the 24 Inch 90 Degree Elbow, a precision-molded component designed for 24-inch diameter playground tube slides. This elbow allows for a full right-angle turn, making it ideal for spiral layouts, space-efficient designs, and custom slide configurations.

Manufactured for durability and long-term performance, this component is backed by a 10-year limited manufacturer's warranty, providing confidence for commercial playground installations. The 90-degree elbow integrates seamlessly with compatible straight tube sections and other modular components, supporting creative designs while maintaining proper fit and alignment.

Ideal for both new playground builds and replacement applications, the 24 Inch 90 Degree Elbow is a dependable solution for maintaining or expanding tube slide systems in high-use environments.
