Description

Extend Your Slide by 30 Degrees!

Add smooth directional transitions to your playground tube slide system with the 30 Inch 30 Degree Elbow, a precision-molded component designed for 30-inch diameter playground tube slides. This elbow allows for gradual turns within modular slide layouts, helping designers create custom configurations while maintaining proper slide flow and alignment.

Built for durability in high-use commercial environments, this component is backed by a 10-year limited manufacturer's warranty, ensuring long-term performance and reliability. The 30-degree elbow integrates seamlessly with compatible straight tube sections and other modular tube slide components, making it ideal for both new installations and replacement applications.

Whether expanding an existing tube slide or repairing a worn component, the 30 Inch 30 Degree Elbow provides dependable compatibility and design flexibility.
