Description

Add Depth to Your Playground!

Tubes are an integral part of any playground system, and the 24 Inch Full 2 Foot Tube provides a durable, modular solution for creating engaging tunnel pathways and transitions. Designed for 24-inch (61 cm) diameter playground tunnel systems, this straight tube section allows designers to extend layouts, connect transition components, or replace worn tunnel sections with confidence.

Manufactured for long-term performance in commercial playground environments, this full tube section integrates seamlessly with compatible elbows, T-Tubes, and Junction Cubes. Its straight-through design supports smooth travel while maintaining proper alignment throughout the playground structure.

Key Features

- Designed for 24-inch diameter playground tunnel systems
- Straight full tube section for modular layouts
- Ideal for extending tunnels or connecting transition components
- Compatible with elbows, T-Tubes, and Junction Cubes
- Available within systems offering 24? and 30? diameter options
- Ideal for commercial playground installations
- Replacement for legacy tunnel tube components
- Built for durability in high-traffic play environments

Available as part of a broader tunnel system offering 24? and 30? (61 cm and 76.2 cm) diameter options, this component is ideal for both new installations and replacement applications where consistency and durability matter most.
