Description

Dynamic Motion Experience

Add dynamic motion and directional flow to tall playground structures with the Starglide Open Entrance Veer Right Wave Slide – 9 Foot Deck Height. Designed for Starglide sectional playground slide systems, this slide combines an open entrance, a wave slide profile, and a veer-right configuration to create an engaging, visually appealing sliding experience.

Engineered specifically for 9-foot deck height playgrounds, this slide integrates seamlessly with compatible Starglide supports, exits, and runouts, making it ideal for both new playground installations and replacement applications. The open entrance improves visibility and ease of access from elevated decks, while the wave profile adds motion and excitement. The veer-right design allows designers to manage traffic flow and maximize layout creativity in multi-slide playground systems.

Ideal for schools, parks, churches, municipalities, and other commercial playground

environments, the Starglide Open Entrance Veer Right Wave Slide delivers durability, safety, and flexible design options for high-traffic play areas.

Key Features

- Designed for Starglide sectional playground slide systems
- Open entrance design for improved visibility and accessibility
- Wave slide profile for added motion and excitement
- Veer right configuration for gentle directional flow
- Built for 9-foot deck height playground structures
- Integrates with compatible Starglide supports, exits, and runouts
- Ideal for new installations and replacement applications
- Commercial-grade playground slide construction
- Built for durability in high-traffic play environments
