Product Image

Description

Experience Epic Rise & Dips!

Add motion and excitement to tall playground structures with the Starglide Wave Slide – 10 Foot Deck Height. Designed for Starglide sectional playground slide systems, this slide features a wave-style profile that introduces gentle rises and dips, creating a more dynamic sliding experience while maintaining a smooth, controlled descent.

Engineered specifically for 10-foot deck height playgrounds, this wave slide is commonly associated with an approximately 20-foot slide length, making it a popular choice for larger commercial play structures. The wave configuration enhances play value and visual appeal while integrating seamlessly with compatible Starglide entry components, supports, exits, and runouts.

Ideal for schools, parks, churches, municipalities, and other commercial playground environments, the Starglide 10 Foot Wave Slide delivers durability, excitement, and reliable

performance in high-traffic play areas.

Key Features

- Designed for Starglide sectional playground slide systems
- Wave slide configuration for added motion and fun
- Built for 10-foot deck height playground structures
- Approximate 20-foot slide length
- Integrates with compatible Starglide entry, support, exit, and runout components
- Ideal for new installations and replacement applications
- Commercial-grade playground slide construction
- Built for durability in high-traffic play environments
