Description

Dynamic Wave Experience

Create a dynamic, high-visibility slide experience on tall playground structures with the Starglide Open Entrance Wave Slide – 10 Foot Deck Height. Designed for Starglide sectional playground slide systems, this slide combines an open entrance with a wave-style profile, delivering added motion and excitement while maintaining a smooth, controlled descent.

Engineered specifically for 10-foot deck height playgrounds, this slide is commonly referred to as a 20-foot playground slide, reflecting its overall slide length rather than deck height. The open entrance design improves visibility and accessibility from elevated decks, while the wave configuration enhances play value and visual appeal.

This slide integrates seamlessly with compatible Starglide supports, exits, and runouts, making it an excellent choice for new playground installations or replacement applications in high-traffic commercial environments.

Key Features

- Designed for Starglide sectional playground slide systems
- Open entrance design for improved visibility and accessibility
- Wave slide profile for added motion and excitement
- Built for 10-foot deck height playground structures
- Approximate 20-foot slide length
- Integrates with compatible Starglide supports, exits, and runouts
- Ideal for new installations and replacement applications
- Commercial-grade playground slide construction
- Built for durability in high-traffic play environments
