Product Image

Description

Add gentle directional flow and design flexibility to tall playground structures with the Starglide Veer Left Slide – 10 Foot Deck Height. Designed for Starglide sectional playground slide systems, this slide features a veer-left configuration that guides riders through a smooth directional shift while maintaining a consistent, controlled descent.

Engineered specifically for 10-foot deck height playgrounds, this slide is commonly associated with an approximately 20-foot slide length, making it well-suited for larger commercial play structures. The veer-left profile enhances layout options, helps manage slide traffic, and adds visual interest without significantly increasing footprint.

The slide integrates seamlessly with compatible Starglide entry components, supports, exits, and runouts, making it ideal for new playground installations or replacement applications.

Key Features

- Designed for Starglide sectional playground slide systems
- Veer left slide configuration for gentle directional movement
- Built for 10-foot deck height playground structures
- Approximate 20-foot slide length
- Integrates with compatible Starglide entry, support, exit, and runout components
- Ideal for new installations and replacement applications
- Commercial-grade playground slide construction
- Built for durability in high-traffic play environments
