Product Image

Description

Engaging & Exciting Ride

Combine motion and directional flow on tall playground structures with the Starglide Veer Left Wave Slide – 10 Foot Deck Height. Designed for Starglide sectional playground slide systems, this slide features a wave-style profile paired with a veer-left configuration, creating an engaging ride that adds both excitement and layout flexibility.

Engineered specifically for 10-foot deck height playgrounds, this slide is commonly referred to as a 20-foot playground slide, reflecting its overall slide length rather than deck height. The wave contours enhance play value, while the veer-left direction helps manage traffic flow and optimize space in multi-slide designs.

This slide integrates seamlessly with compatible Starglide entry components, supports, exits, and runouts, making it ideal for new installations or replacement applications in high-traffic commercial environments.

Key Features

- Designed for Starglide sectional playground slide systems
- Wave slide profile for added motion and excitement
- Veer left configuration for gentle directional flow
- Built for 10-foot deck height playground structures
- Approximate 20-foot slide length
- Integrates with compatible Starglide entry, support, exit, and runout components
- Ideal for new installations and replacement applications
- Commercial-grade playground slide construction
- Built for durability in high-traffic play environments
