Description

Controlled & Smooth Ride

Add directional flow and enhanced visibility to tall playground structures with the Starglide Open Entrance Veer Left Slide – 10 Foot Deck Height. Designed for Starglide sectional playground slide systems, this slide features an open entrance combined with a veer-left configuration, guiding riders through a smooth directional transition while maintaining a controlled, enjoyable descent.

Engineered specifically for 10-foot deck height playgrounds, this slide is commonly referred to as a 20-foot playground slide, reflecting its overall slide length rather than deck height. The open entrance improves accessibility and sightlines from elevated decks, while the veer-left design adds layout flexibility and helps manage slide traffic in multi-slide playground environments.

This slide integrates seamlessly with compatible Starglide supports, exits, and runouts,

making it ideal for both new commercial playground installations and replacement applications.

Key Features

- Designed for Starglide sectional playground slide systems
- Open entrance design for improved visibility and accessibility
- Veer left slide configuration for gentle directional movement
- Built for 10-foot deck height playground structures
- Approximate 20-foot slide length
- Integrates with compatible Starglide supports, exits, and runouts
- Ideal for new installations and replacement applications
- Commercial-grade playground slide construction
- Built for durability in high-traffic play environments
