Description

Add Extra Motion to Your Slide Experience

Add motion and controlled directional flow to tall playground structures with the Starglide Veer Right Wave Slide – 10 Foot Deck Height. Designed for Starglide sectional playground slide systems, this slide combines a wave slide profile with a veer-right configuration, creating a dynamic sliding experience that enhances play value while maintaining a smooth, predictable descent.

Engineered specifically for 10-foot deck height playgrounds, this slide is commonly referred to as a 20-foot playground slide, reflecting its overall slide length rather than deck height. The wave contours add excitement, while the veer-right direction helps designers manage traffic flow and optimize layout on larger commercial play structures.

This slide integrates seamlessly with compatible Starglide entry components, supports, exits, and runouts, making it ideal for both new playground installations and replacement applications

in high-traffic environments.

Key Features

- Designed for Starglide sectional playground slide systems
- Wave slide profile for added motion and excitement
- Veer right configuration for gentle directional flow
- Built for 10-foot deck height playground structures
- Approximate 20-foot slide length
- Integrates with compatible Starglide entry, support, exit, and runout components
- Ideal for new installations and replacement applications
- Commercial-grade playground slide construction
- Built for durability in high-traffic play environments
