# Aluminum Spiral Slide Chute for 16 foot Deck Height

https://www.dunriteplaygrounds.com/store2/67448-Aluminum-Spiral-Slide-Chute-for-16-foot-Deck-Height

## Product Image

## Description

### Superior Slide Experience

The Aluminum Spiral Slide for 16 Ft Deck Height is engineered for large-scale playgrounds, architectural builds, and custom installations where maximum height and performance are required.

This model features a one-piece welded aluminum construction, eliminating joints and mechanical connections that can weaken over time. The result is a structurally superior slide designed for long-term durability in high-use environments.

At 16 feet, the slide delivers an extended, high-speed spiral ride, while its deep helical curves and high outer walls provide enhanced rider containment and safety. Despite its height, the spiral configuration minimizes the footprint required for installation.

Manufactured from premium aluminum, this slide offers:

- Cooler surface temperatures than plastic
- Resistance to UV fading and cracking
- Reduced static electricity buildup
- Superior resistance to vandalism and wear

With options for custom colors, layouts, and themed designs, this slide can be tailored to fit complex environments and creative concepts.

At this elevation, project planners may also evaluate enclosed tube slides or embankment slides depending on site conditions, supervision levels, and safety requirements.
