## Product Image

## Description

### Five-Note Tuned Drums Outdoor Musical Instrument, In-Ground | Tuned-DB

This five-piece Tuned Drums set creates a sequence of low-to-high pitched percussive tones through hand-played drum heads. The instrument is suited to interactive outdoor music settings and uses five different-diameter drums whose synthetic playing caps can be struck without mallets. This record specifies an in-ground configuration; installed height and footing details depend on the selected age and post configuration.

### Product specifications

| | |
|---|---|
| Catalog model | Tuned-DB |
| Instrument family | Tuned Drums |
| Number of drums/tones | 5 distinct tones |

| | |
|---|---|
| Head material | Synthetic caps |
| Mounting | In-ground per ODS model name |
| Finished heights | Depend on standard versus toddler configuration and installation details |

## Selection and comparison

Compare the standard-height and toddler-height Tuned Drums arrangements using the intended age group and installed playing heights, not only the drum diameters. Also distinguish this hand-played percussion family from mallet-played chimes or bells. Confirm the supplied in-ground kit and age configuration.

Confirm current product revision, compatibility, applicable installation instructions and site requirements before ordering.
