Description

Horse Spring Rider, 02-07-0053

Freestanding single-rider playground spring toy with a horse-shaped high-density polyethylene body and heavy-duty steel coil spring. The model is a complete rider package with surface mounting anchor bolts, not just a replacement spring or an inground footer kit.

Verified product details

- Intended for children ages 2 to 5.
- Single-rider capacity; manufacturer and reseller product details list approximately 55 lb product weight.
- Rounded rider profile, grip handles and a low step-on height.
- Surface mount concrete anchors are provided; optional inground mounting hardware is sold separately.
- Published play use-zone specifications differ between sellers; use the current manufacturer's installation drawing for actual site layout.

Comparison and mounting options

Model / option	Product or use	Selection detail
02-07-0053	Horse spring rider	Single child, horse theme, surface anchor mounting
02-07-0054	Truck spring rider	Single child, truck theme; separate product
02-07-0187	Separate inground mounting accessory	Select only when the approved installation calls for inground mounting

Installation and safety: Maintain the required impact-attenuating surfacing and follow the model-specific installation manual. Verify the selected footing configuration before installation.
