Description

Truck Spring Rider, 02-07-0054

Truck-themed freestanding playground spring rider for imaginative rocking play by one child. Its molded HDPE body is supported by a heavy-duty steel spring; the complete model includes concrete anchor bolts for surface mounting.

Verified product details

- Intended for children ages 2 to 5.
- Single rider; published product weight about 55 lb.
- Play body uses weather-resistant HDPE; heavy-duty steel spring provides rocking motion.
- Surface mounting anchors are included with the product.
- An inground mount is available separately, rather than being included as part of the surface-mount kit.
- Some published use-zone dimensions conflict, so refer to the current model installation

drawing for the final clearance.

Comparison and mounting options

Model / option	Product or use	Selection detail
02-07-0054	Truck spring rider	Single-user truck theme and surface-mount anchors
02-07-0053	Horse spring rider	Single-user horse theme; different play form
02-07-0187	Optional inground kit	Additional item when inground installation is specified

Installation and safety: Use appropriate resilient surfacing and follow the approved footing plan. Do not assume the surface anchor set is suitable for every site.
