Description

Seven-Note Contrabass Chimes with In-Ground Steel Posts | CCH-IG

The Contrabass Chimes create low, resonant musical tones on seven tall anodized aluminum chimes. The installation can be arranged for surrounding listening and playing; the manufacturer specifies two mallet poles with four mallets total. Model CCH-IG refers to the in-ground steel mounting configuration.

Verified model specifications

Model	CCH-IG
Instrument	Contrabass Chimes
Notes	7
Chime material	Anodized aluminum

Tonal character	Bass, sustaining
Musical scale	C major pentatonic
Chime diameter	4 in each
Chime heights	Approximately 88 to 104.25 in; installed heights vary
Included playing tools	2 mallet poles and 4 mallets
Mounting	In-ground steel

Selection and comparison

Contrast the deep, sustaining Contrabass Chimes with the Pagoda Bells, which have eight stainless steel bells and a brighter alto/soprano character. These are different instrument families rather than interchangeable material choices. Confirm mounting style and layout for the site.

Verify current installation requirements, site layout, protective surfacing and the supplied product revision before ordering.
