Product Image

Description

The 36 GALLON CLASSIC RECEPTACLE DOOR RAIN BONNET LID PLASTIC LINER, model CL-36RB, is a 36-gallon Classic outdoor waste receptacle with an included rain bonnet lid and plastic liner. Its hinged service door gives maintenance crews access to the liner without lifting the entire container body. The 2026 manufacturer listing explicitly identifies the rain bonnet top as the included lid configuration, rather than a separately ordered accessory for this complete SKU.

Exact model specifications

Model	CL-36RB
2026 listed configuration	36 GALLON CLASSIC RECEPTACLE W/ DOOR, W/ RAIN BONNET LID & PLASTIC LINER

Collection	Classic
Capacity	36 gallons
Included top	rain bonnet lid
Included liner	Plastic liner
Service access	Hinged access door
Finish	Powder-coated welded steel

Configuration and companion comparison

This version	rain bonnet lid and plastic liner
Other lid configurations	CL-36AU (ash urn), CL-36FT (flat top)
Liner and lid	Both included in each 2026 CL-36 configuration
Mounting	Confirm portable/surface mount requirements with manufacturer

The Classic receptacle uses welded steel slat construction with a powder-coated finish. The manufacturer drawing describes solid steel hinges and a 36-gallon body measuring approximately 41-1/4 inches high and 28-1/2 inches in diameter. Choose a flat top for a straightforward disposal opening, an ash urn top for the specific designated ash-use configuration, or a rain bonnet where the project calls for that lid design. Do not substitute separate replacement-lid models without confirming fit. Coordinate service clearances around the access door and verify the site attachment method for the installation.
