Description

Small Granite NatureROCKS Freestanding Boulder Climber

Model GRN-SM adds realistic rock-climbing texture and movement challenges to parks, school playgrounds and naturalized play areas. The small granite climber offers a more compact climbing feature than the medium and large models. The weather-resistant, glass-fiber-reinforced concrete (GFRC) shell has a hand-painted granite appearance modeled on natural rock outcroppings. Built-in forklift channels support site handling.

Model specifications

- Model: GRN-SM
- Finish: natural granite appearance
- Construction: glass-fiber-reinforced concrete
- Size category: small
- Age designation: confirm with current installation specification for this exact model
