Description

Hawks Nest natural | UPLAY-017-N

Hawks Nest natural is the natural-palette configuration of the UPLAY-017 playground structure.

The listed configuration is a complete play structure, not an individual slide or climber. Its precise activities, deck elevations, critical fall height, accessible play routes, and installed use zone must be checked against the matching manufacturer layout and installation documents before procurement.

Manufacturer UPLAY structures use powder-coated galvanized steel supports and molded plastic play components. Ground-spike mounting is listed where stated in the exact model line; alternate anchor or in-ground mounting packages must be selected separately when required.

Exact model specification and configuration	
Model	UPLAY-017-
Product	Hawks Nest
Manufacturer palette	Natural

Included mounting	Ground spike
Published shipping weight	1284 lb
Other catalog models and available configurations	UPLAY-01 UPLAY-01

Use model UPLAY-017-N when requesting a quotation or matching installation documents. Available options and accessories should be confirmed against the selected model, rather than assumed to be included.

Featured play activities

Manufacturer documentation identifies Vine climber, Beanstalk climber, Straight slide, Curved slide, Ship wheel panel, Bongo drums, Rain wheel. These features support a mix of movement, imaginative play and social interaction, with exact installed layout confirmed by the model drawing.
