Description

Keegan's Kastle Natural Playground Structure (UPLAY-030N)

The UltraPlay Keegan's Kastle Natural is the natural-color configuration of the UPLAY-030 commercial playground structure. Its interconnected play experiences combine climbing, sliding, musical play and pretend play for parks, early-learning centers, churches and multifamily recreation areas. The manufacturer lists capacity for 26 to 40 children and describes the structure as meeting ADA guidelines.

Play experiences

Featured activities include the 4-foot Vine Climber, Beanstalk Climber, double straight slide, curved slide, straight slide, Bone Bridge, Ship's Wheel Panel, Window Panel, Rain Wheel and Bongo Drums. The varied activities provide multiple ways to move and interact across the same structure.

Manufacturer specifications

Exact ODS model	UPLAY-030N
Color configuration	Natural
Manufacturer structure family	UPLAY-030
Manufacturer-listed capacity	26 to 40 children
Required use zone	31 ft 9 in x 34 ft 6 in
Critical fall height	5 ft
Manufacturer-listed weight	2,047 lb
Vertical posts	Powder-coated 13-gauge galvanized steel tube
Slide and panel materials	Rotomolded and blow-molded heavy-duty plastic / HDPE components
Standard mounting	Ground-spike surface-mount hardware included
Optional mounting	Anchor-bolt surface-mount kit or inground kit, each purchased separately

Natural and Playful configurations

Configuration	Model	What differs
Natural	UPLAY-030N	Natural color selection
Playful	UPLAY-030P	Playful color selection

Both configurations share the UPLAY-030 play-event lineup, use zone, listed capacity and standard ground-spike mounting. For site planning, confirm the current manufacturer installation drawing, the specified mounting kit, playground surfacing and available clearance before ordering. UltraPlay identifies optional Keegan's Kastle anchor-bolt kit 33-12-0170 and inground kit 33-12-0172 in its 2026 price list; neither kit is included with the standard ground-spike configuration.
