Description

Universal In-Ground Footer Kit for Horse, Truck and Seesaw Spring Riders

This in-ground footer kit is a separately ordered mounting accessory for compatible spring-rider equipment. Manufacturer model 02-07-0187 is listed for the two-rider spring seesaw and horse and truck spring riders. It supplies an alternative to the concrete anchor-bolt mounting approach described for the complete riders. This listing is for the footer kit, not a complete rider and not a confirmed replacement spring.

Product specifications

Manufacturer kit reference	02-07-0187
Catalog record	74370; model field unpopulated
Product type	In-ground mounting/footer kit

Compatible equipment	02-07-0053 horse rider; 02-07-0054 truck rider; 02-07-0055 two-rider seesaw
Included equipment	Mounting kit only; rider sold separately
Installation	Follow the corresponding rider and footer-kit instructions

Selection and comparison

The standard rider listings describe included surface-mount anchor bolts, with the 02-07-0187 in-ground mounting kit available separately. Select this kit only when its manufacturer-specified in-ground installation is required. It does not replace the rider body or establish a replacement-spring specification.

Confirm current product revision, compatibility, applicable installation instructions and site requirements before ordering.
