Description

The 6 foot PASADENA STRAIGHT BENCH PERFORATED, model 15-P6, is the 6-foot perforated Pasadena straight bench. Its one-piece backless layout uses formed steel plate with a precision-punched seating pattern, creating a modular outdoor seating option for parks and other public spaces. The exact 2026 price-list model establishes the 6-foot length, separate from the shorter and longer Pasadena configurations.

Exact model specifications

Configuration and companion comparison

Selected length	6 feet, model 15-P6
Other collection lengths	15-P2 (2 feet), 15-P4 (4 feet)
Connection to adjacent benches	Hardware and second bench separately specified
Backrest	Backless design

Manufacturer drawings describe plate-steel seats reinforced by steel strip and electrically welded construction, with zinc-rich epoxy primer beneath the oven-cured powder-coat finish. Pasadena benches may be arranged as standalone units or joined into longer layouts using specified connecting hardware. A pictured adjacent bench is not included with this SKU. Check the exact model installation drawing before selecting anchors, connection fasteners or surface preparation. When a coordinated seating arrangement is planned, verify the available model lengths and the space needed for accessible circulation around the bench units.
