Description

Whirl and Twirl Spinner with Clicker

The UP101 combines a tilted rotational playground bowl with a clicking sound effect. Children can propel the bowl while seated or receive a push from another participant; the curved rim provides a handhold and the bowl is shaped to drain water. It is the clicker configuration of the Whirl and Twirl family.

Verified model specifications

Model	UP101
Activity	Tilted bowl spinner
Audio element	Clicker sound feature
Listed weight	35 lb
Installation	In-ground
Play surface	Protective surfacing required
Related family model	UP100 standard Whirl and Twirl without clicker

Selection and comparison

Choose UP101 when the audible clicker is desired. UP100 uses the same general rotational play approach without the clicking feature. Compare the equipment specifications and use-zone instructions for the delivered model; the two are distinct configurations, not material substitutes.

Verify current installation requirements, site layout, protective surfacing and the supplied product revision before ordering.
