Configuration and accessory comparison

Selected model	U rack, inground galvanized
Mounting options	S inground and SM surface variants are distinct products
U bike rack	1.9-inch steel tubing, model G5050
Flash rack	2-3/8-inch steel tubing, model G5060
Bicycle spaces	Up to two bikes per rack

This U bicycle rack is the inground, galvanized model in the 2026 price list. Its steel tubing is identified as 1.9 in outside diameter and the rack offers parking for up to two bicycles.

UltraSite offers surface-mount and inground versions. These configurations use different catalog numbers because the required foundations and anchors differ, not simply a finish selection.

The U rack and Flash rack have different tubing specifications and distinct profiles. Plan clear space for both bicycle frames and pedestrian movement; locks, bicycles and installation anchors are not represented as included accessories.
