Product Image

Description

The 02-07-0261 inground mounting kit is the optional below-grade installation alternative for the Moon Crater Climber. The climber is ordinarily supplied with surface-mount hardware.

Features and specifications

- Accessory inground mounting kit for the Moon Crater Climber
- Inground installation hardware is sold separately from the climber
- Climber has a 21-foot-diameter use zone and approximately 4-foot-5-inch fall height; these describe the compatible climber, not the kit
- Use the specified manufacturer footing details and resilient surfacing requirements

Model and configuration comparison

Model	Configuration	Selection detail

02-07-0261	Optional inground mounting kit	For below-grade Moon Crater installation
Moon Crater base climber	Climber with surface-mount kit	Complete play unit supplied with surface mounting; inground kit purchased separately

Mount kit only; does not include the Moon Crater Climber.
