Product Image

Description

The 6 foot HARTFORD HORIZONTAL SLAT LEAN RAIL INGROUND MOUNT is the 6-foot horizontal-slat leaning rail, model 13S-HS6, for brief standing breaks at parks, campuses, pedestrian areas and gathering spaces. A leaning rail provides a place to rest temporarily without the deeper seating footprint of a full bench. This listing is for the inground configuration, not an interchangeable mounting kit.

Exact-model specifications

Exact SKU	13S-HS6
Length	6 ft
Mount	Inground
Rail style	Hartford horizontal slat
Finish selection	Powder-coated metal; confirm selected color on quotation
Price-list configuration	6' HARTFORD HORIZONTAL SLAT LEAN

RAIL - INGROUND MOUNT

Configuration comparison

This model	6 ft, inground
Same-length alternate mounting	13SM-HS6, surface mount, separately listed
Other available lengths	4 ft, 6 ft and 8 ft in the Hartford leaning-rail range
Alternative rail style	Richmond leaning rail, separate product family

Specify the actual anchoring method before preparing foundations: surface-mounted and inground models are separate SKUs. Coordinate the powder-coat color with surrounding site furnishings. The Hartford range also includes bench-style seating for projects that need seated rest rather than a standing lean point.
