Description

The Rockin Drums inground, model MEC-007, is a freestanding UltraPlay activity for music and rhythm play in outdoor play environments. Unlike a replacement component or installation-only package, this entry identifies the actual play product. Its name and activity type distinguish it from the manufacturer's neighboring climbers, spinners, playhouses, garden activities and musical features.

Model specifications

Exact manufacturer model	MEC-007
2026 catalog identification	Rockin' Drums includes inground mount
Published shipping weight	79 lb
Product family	Rockin' Drums

Configuration and related choices

This model	Rockin' Drums (MEC-007)
Related activity options	Choose a different catalog SKU for other play functions
Site preparation	Inground mounting included
Project review	Confirm clearance, surfacing and installation documents

The manufacturer's 2026 listing identifies the product as rockin' drums includes inground mount. For a complete site design, use the exact manufacturer model to obtain the applicable play-area clearance, suitable age guidance, safety surfacing and foundation details. Do not assume that an unlisted inground kit, different colorway or complementary activity is included. Coordinate related play experiences by function while retaining this SKU's distinct configuration.
