Description

Tenor Tree Outdoor Musical Bells with Inground Mount | TREE-IG

The Freenotes Harmony Park Tenor Tree turns a three-sided tree sculpture into an interactive outdoor musical instrument. Striking its green anodized-aluminum leaves produces bright, sustaining tones from 12 notes arranged in three harmonically complementary chords. The leaf-shaped sounding elements contrast with the brown trunk and create an inviting musical activity for parks, schools and community gathering spaces.

Three black mallets are included, enabling one to three participants to play together. Exact model **TREE-IG** uses an inground steel mounting configuration. The TREE-PM portable configuration is a separate model and should not be substituted when specifying site installation.

Exact-Model Specifications
