Description

ActionFit Chin Up Combo Surface Mount | UP226SM

The ActionFit UP226SM Chin Up Combo is a surface-mounted commercial outdoor fitness station designed for multiple users and upper-body strength training. Two chin-up bar levels provide different exercise heights, while curved hand grips offer varied hand positions and workout challenges. This exact model is the surface-mount configuration; the UP226S is the separately identified inground version.

	illustration
Grip design	Curved hand grips offering multiple hand positions
Finish	Powder-coated finish; metallic shown in manufacturer literature
Hardware	Stainless steel
Manufacturer-stated standard	ASTM F3101-15 for unsupervised public-use outdoor fitness equipment

Choosing the mounting option

UP226SM is specified for surface mounting. The companion UP226S is identified by the manufacturer as the inground mounting alternative. Select the configuration for the planned site and obtain current installation drawings and anchorage requirements before construction.

Designed for parks, recreation sites, and outdoor fitness circuits. Confirm current model availability, installation clearances, surfacing requirements, and finish options with DunRite Playgrounds before specifying.
