Product Image

Description

The Chin Up Low Inground Mount, exact 2026 manufacturer model UP227S, is the inground ActionFit Chin Up Low station intended for upper-body pulling strength. The installation design and exercise mode are controlled by the selected model, not by a generic fitness equipment family description.

Exact model specifications

Equipment	Chin Up Low
Manufacturer model	UP227S
Mounting configuration	inground
Primary workout	upper-body pulling strength
Target users	Outdoor fitness users aged 13 or older
Material finish	Powder-coated steel

Configuration comparison

This model	Chin Up Low, inground
Mounting alternative	Check specific manufacturer model availability

Related fitness activities	Push-up, chin-up and leg-extension stations exercise different muscle groups
Site design	Follow exact equipment clearances, foundation and surfacing requirements

The chin-up apparatus is intended for upper-body pulling exercise. Combo and height-specific versions are separate stations and should not be represented as interchangeable. Fitness equipment requires the installation and fall-surface details applicable to its precise model. The ActionFit range is designated for ages 13 and older. Powder-coated supports and outdoor fastening systems require routine inspection and maintenance in public fitness areas. Confirm the current model-specific clearance space, training envelope, anchoring and surfacing requirements before preparing installation drawings. Nearby fitness stations may form a coordinated workout circuit, but another exercise station or mounting alternative is not included with this catalog item.
