Description

Enhance Play Value

Add smooth motion and directional flexibility to very tall playground structures with the 30 Inch Diameter Slide – 12 Foot Deck Height, Curved (Left or Right). Designed for commercial playground environments, this slide features a curved profile that gently guides riders to the left or right, enhancing play value while maintaining a controlled, comfortable descent.

Built for 12-foot deck height playgrounds, this 30-inch diameter tube slide provides a spacious sliding surface suited for older children and high-capacity play environments. The curved configuration allows playground designers to manage exit placement and optimize layouts on larger, more complex structures—ideal for schools, parks, churches, daycares, and community playgrounds.

Durable and dependable, this slide is well-suited for new installations and replacement applications in demanding, high-traffic settings.
