Description

Fast, Smooth Ride!

Deliver a fast, smooth, and classic sliding experience from elevated playground structures with the 30 Inch Diameter Slide – 15 Foot Deck Height, Straight. Designed for commercial playground environments, this straight slide configuration provides a direct, uninterrupted descent that emphasizes speed, simplicity, and reliability.

Built for 15-foot deck height playgrounds, this slide offers a spacious sliding surface suitable for older children and high-capacity play systems. The straight design makes it ideal for layouts where designers want a clean exit path and minimal footprint while still offering an exciting ride from significant height.

Durable and dependable, this slide is well-suited for new installations and replacement applications in demanding, high-traffic environments such as schools, parks, churches, and municipal playgrounds.
