Product Image

Description

32-gallon horizontal-slat steel park trash receptacle body

The HS-32 is a 32-gallon metal waste receptacle featuring a horizontal slat cutout pattern. It is intended for parks, plazas, campuses and outdoor shared spaces where a coordinated steel litter container is preferred.

Product specifications

Model	HS-32
Capacity	32 gallons
Body	Steel with laser-cut horizontal-slat design
Body finish	Powder-coated steel over zinc-rich primer, per model listing
Construction	MIG-welded receptacle assembly
Installation	Portable; mounting hardware sold separately

Excluded accessories	Lid and plastic liner sold separately

Selection and comparison

Compare the HS-32 horizontal-slat appearance with the PR-32RE perforated recycling-logo receptacle and the EX-32RE expanded-metal recycling version. Pattern and recycling identification differ; verify compatible lids and liners for each.

Confirm model compatibility, installation requirements and selected finish before ordering.
