Description

Big Sky playful with SHADE with ground spikes and inground Shade posts | UPLAY-044-P

Big Sky playful with SHADE with ground spikes and inground Shade posts is the playful-palette configuration of the UPLAY-044 playground structure.

The listed configuration is a complete play structure, not an individual slide or climber. Its precise activities, deck elevations, critical fall height, accessible play routes, and installed use zone must be checked against the matching manufacturer layout and installation documents before procurement.

Manufacturer UPLAY structures use powder-coated galvanized steel supports and molded plastic play components. Ground-spike mounting is listed where stated in the exact model line; alternate anchor or in-ground mounting packages must be selected separately when required.

Exact model specification and configuration		
	Model	UPLAY-044-
	Product	Big Sky
	Manufacturer palette	Playful
	Included mounting	Ground spike
	Published shipping weight	2770 lb
