Description

Age Group: 5 - 12

Activities: 14

Capacity: 40-44

Use Zone: 43'-5" x 35'-8"

Fall Height: 5'-0"

Progressive organizations like park and recreation districts, city councils, landscape architects and even some school districts are seeking unique play spaces that stand out from other local playgrounds. You are looking for something that will attract families and create a community play space that will create cherished memories.

The Seychelles Treehouse playground brings the forest to your playground with natural and life-like, themed play components. Create a spectacular focal point for your play space that looks like a wild forest. With its large supports, broad platforms and a natural color palette to choose from, a TreeHouse Playground can be the focal point of your family park. This system is designed to handle large end user volumes without constricting the excitement and enthusiasm found in the flow of play. The time tested reliability of the materials sourced for and combined with the skilled craftsmanship at the factory, produce equipment that is durable and requires less maintenance over time so that your play space remains fun, inviting and open to the

public. Treehouse playgrounds are artistically crafted with your choice of 5" OD galvanized steel or aluminum support posts which are coated with a baked on polyester powder coat finish for a lifetime of protection against the elements. All handrails, gates and barriers are fabricated with stainless steel tubing. All steel decking and stairs are encased in a long lasting PVC coating. The realistic treehouse, panels, climbers and roofs are environmentally friendly high molecular carbon fiber materials. The three dimensional plastic slides and toppers are rotationally molded using virgin compounded resins that feature greater UV breakdown resistance over dry blended resins. The HDPE sheet plastic climbers and activities are specifically manufactured in house with high quality control.

Includes: Timber Slide (2), Incline Stair, Safety Panel, Pine Tree Topper, Transfer Station, Suspension Bridge, Sloping Roof (2), Boulder Climber, Root Climber, Palm Topper, Stump, Stump Crawl Tunnel, Log Climber
