Description

Age Group: 5-12

Activities: 7

Capacity: 24

Use Zone: 48'10" x 40'-3"

Fall Height: 7'-3"

NEXUS Series playgrounds offer unique solutions for organizations that have spaces that are curved, round or not the traditional square space. Schools, municipalities, city or county park districts that want to reduce risk but still provide exceptional activity will find this a good fit! The NEXUS series offers design flexibility and a compact footprint that can't be found with traditional post and platform styles of playground equipment. Safety and durability are standard. NEXUS adds to these traits by removing platform and keeping activities at or close to the ground level. Carefully and skillfully crafted with 4" OD galvanized steel posts are powder coated. As well, steel handrails, barriers, gates and climbers are also coated with this baked on polyester powder coat finish for a lifetime of protection against the elements. The three dimensional slides, panels and climbers are rotationally molded using virgin compounded resins that feature greater UV breakdown resistance than dry blended resins. The HDPE sheet plastic climbers and activities are specifically produced IN HOUSE for higher quality control.
