Description

Age Group: 5-12
Activities: 21
Capacity: 82
Use Zone: 61'-11" x 41'-7"
Fall Height: 8'-0"

Parks and Recreation Departments, City Boards, Landscape Architects and mission focused not-for-profits recognize the scarcity of play spaces where everyone can participate to the best of their ability. The spirit of accessible playgrounds can often fall short of an inclusive playground by only following the letter of the design standard. All inclusive playgrounds are accessible, but not all accessible playgrounds are inclusive! You and not only designing for the children. You must also accommodate parents and caregivers of various abilities as well. Following some fundamental principles, an inclusive playground will ensure that everyone can access the best play activity on the playground. Be it a spiral slide or a crazy spinner or web climber, everyone can reach the entrance and exit points. Another element is colocation of various kinds of the same type of activity so that someone who has limited physical abilities can enjoy the same activity as the person close to them on a similar but different challenging activity. We can all play together. Inclusive playgrounds are artistically crafted with your choice of 5" OD galvanized steel or aluminum support posts. These, along with the steel handrails,

barriers, gates and climbers are also coated with this baked on polyester powder coat finish for a lifetime of protection against the elements. The three dimensional slides, panels and climbers are rotationally molded using virgin compounded resins that feature greater UV breakdown resistance than dry blended resins. The HDPE sheet plastic climbers and activities are specifically produced IN HOUSE for higher quality control.
