Description

Smooth, Engaging Ride

Add excitement and visual appeal to any playground with the Spiral Slide – 2 Piece with Hood. Designed for commercial playground environments, this spiral slide configuration delivers smooth, engaging movement while the integrated hooded entrance provides added comfort, shade, and rider confidence.

The two-piece spiral design creates a compact footprint while still offering a fun, twisting ride that children love. The hooded entry helps define the slide entrance and enhances safety by guiding proper positioning before descent. This slide is ideal for schools, parks, churches, daycares, and community playgrounds.

Built for durability and daily use, the Spiral Slide – 2 Piece with Hood works well for new playground installations or replacement applications.
