Description

Smooth, Twisting Motion

Create an exciting, open-access sliding experience on taller playground structures with the 9 Foot Deck Height Spiral Slide – Open Entrance (139"). Designed for commercial playground environments, this spiral slide delivers smooth, twisting motion while the open entrance allows for easy access and clear visibility at the top of the slide.

Built specifically for 9-foot deck height platforms, the spiral configuration maximizes slide length within a compact footprint, increasing play value without requiring additional space. The open entrance design is ideal for playgrounds that prefer unobstructed entry while still offering dynamic spiral movement.

Durable and engineered for daily use, this slide is a great fit for schools, parks, churches, daycares, and community playgrounds, whether for new installations or replacement projects.
