Description

Extended Spiral Experience

Create a high-impact playground feature with the 9 Foot Deck Height Spiral Slide with Hood (320"). Designed for commercial playground environments, this extended spiral slide delivers a longer, more exciting ride while the hooded entrance provides shade, comfort, and proper rider positioning before descent.

Built for 9-foot deck height platforms, the 320-inch slide length significantly increases ride time and engagement compared to standard spiral slides. The spiral configuration allows for this extended length while maintaining an efficient footprint—making it ideal for schools, parks, churches, daycares, and community playgrounds looking to add a standout slide experience.

Durable and engineered for daily use, this spiral slide is well-suited for new installations or replacement applications where safety, longevity, and excitement are top priorities.
