Description

Blaze is proud to announce the new Blaze 4 Burner Marine Grade LTE Grill. Blaze introduces a commercial style grill that was designed with coastal BBQ challenges in mind. Blaze is also proud to announce that this unique grill is now rated for Multi-User Applications! The Marine Grade 4-Burner LTE is now available and approved for multi-family dwellings, apartments, hotels, and similar applications. With the heavy use of grills located in common areas, we made sure to add in an extra layer of protection for this grill – our innovative flame guard. This perforated piece sits in the drip pan of the grill, reducing the chance of a grease fire in the pan. With the frequent use of multi-user areas, this is a great extra safety feature to have. In addition to our Lifetime Warranty, Blaze will now be covering labor charges in the new and improved multi-family warranty! (Please see your Owners Manual for full details on how to check whether or not this applies to your grill.)

This unique grill is constructed out of marine grade 316 stainless steel. The Blaze 4 Burner Marine Grade LTE showcases all the same great features owners come to expect from the Blaze LTE Series grills: cast stainless steel burners, stainless steel flame tamers, heat zone separators, double lined hood, and our unique triangular cooking grids all of which are upgraded to 316L stainless steel. Blaze knows the summer fun never stops on the coast and residents there love to grill year round, and we designed this grill with those customers in mind. Blaze offers the 4 Burner Marine Grade LTE in natural gas and propane, and is also available

as a cart model.
