Description

The Blaze Premium LTE+ product line introduces a commercial grade multi-user grill that is designed with coastal cooking challenges in mind. The Blaze Premium LTE+ 32-inch Marine Grade gas grill includes a new and improved interior lighting system, hood assist, and a LED illuminated control system with safety glow lighting, plus a 316L stainless steel construction ideal for saltwater environments. The grill comes with 4 commercial grade multi-user cast 316L stainless steel burners that each deliver an impressive 14,000 BTUs of cooking power, for a total of 56,000 BTUs on the cooking surface. The 10,000 BTU infrared rear burner works great with the optional rotisserie kit for grilling versatility. The stainless steel heat zone separators allow for different cooking zones across the grilling surface. This adds to your grilling experience, creating separate zones that can be used for different styles of cooking. The flame taming grid minimizes flare-ups while you enjoy your Blaze grill, and the full-width drip tray makes cleanup simple. Upgraded interior lights now stay on while grill is use and the new illuminated control knob change colors when the grill is ignited for a signature decorative accent. The stainless steel grill hood is double lined to protect the outer layer from heat discoloration and includes a hood-assist mechanism for effortless opening and closing. Blaze offers the 4-Burner Marine Grade Premium LTE+ in natural gas and propane, and is also available as a cart model.
